🪪 PROFILE

Currently studying on the CodeClan / CodeBase 16-week, Professional Software Development course where I have acquired skills in Full-Stack software development. I am a career changer and prior to studying with code clan spent multiple years working within organisations that support vulnerable adults, managing chaotic behaviours and empowering individuals to recovery from addiction and to reach their full potential. I am actively seeking a junior developer position where I can use my new technical skills and the skills I've acquired in Social Care and Housing to be a valued member of the ecosystem. Having worked in care I'm passionate about tech for good, green tech, as well as hold a keen interest in maps and creative technology.

💻 TECHNICAL SKILLS

`Javascript` `Python` `SQL` `React` `ArcGIS` `HTML` `CSS`

`Flask` `Java` `R Markdown` `CypressIO` `Insomnia REST`

`Jinja2` `Spring` `Psycopg2` `Git` `MongoDb` `IntelliJ`

`VSCode` `Data Ethics`

🖥 PROJECTS

08/2023 –
08/2023

Pet Care Console,
Solo Python Project – CodeClan / CodeBase 🔗
A veterinary management application utilising CRUD functionality and date time functions. Pet Care Console was developed as my solo Flask project, the intention was to create an easy to use database UI for vet surgeons to manage admissions of pets and assigning them to services.

- Python
- HTML/CSS
- Flask
- PostgresSQL & psycopg2

10/2023 –
10/2023

Navigate, Group Project, Full-Stack React – CodeClan / CodeBase 🔗
Navigate is a Full-Stack React app for Social Service managers to assign service users to different Homeless Shelters in and around Glasgow City. The idea came from my previous career background, working in homeless shelters and harm reduction units.

- React
- MongoDb
- Javascript
- HTML/CSS
- ArcGIS
- Insomnia

10/2023

Capstone Project,
Group Project, TBC – CodeClan / CodeBase
My last project of the Professional Software Development course – project to be confirmed.
